Transfer and Articulation Policy: Transfer is recognized as a crucial element within a seamless educational system. The purpose of this policy is to promote seamlessness. A seamless educational system offers the best resources to provide a high quality education for every student, and empowers and encourages each student to reach maximum potential by engaging in life-long learning. This includes:

- Aligning high school and college expectations and standards to improve access and success;
- Providing access to higher education;
- Providing high quality advising and information at every point of the journey to ensure that students understand the preparation required to succeed at the next level;
- Providing a smooth transition from one level of learning to the next level.

To facilitate transfer and articulation across DHPH, the Board of Directors shall provide for a Transfer and Articulation Policy. The policy will:

- Identify courses acceptable for meeting general education core requirements
- Create an effective, faculty-led structure for discipline level course articulations based on learning outcomes
- Ensure appeals processes exist
- Address barriers to inter-institutional cooperation as they arise
- Use learning outcomes to determine course equivalency
- Implement a clear ongoing transfer structure
